EDUCATION

Georgia Institute of Technology, Atlanta, Georgia, USA

- Ph.D. student in Computer Science

Aug 2017 – Present

- Area: Systems
- Focus: Big Data, Graph Processing Systems, Deep Learning Systems.

University of Science and Technology of China (USTC), Hefei, Anhui, China

- Bachelor of Computer Science and Technology
- Graduated with **Honors**.
- Cumulative GPA: 3.80 / 4.30

Sep 2013 – Jul 2017

RESEARCH EXPERIENCE

Large-scale Distributed Cluster Computing for Deep Learning Networks

- Distributed Data Intensive Systems Lab, Georgia Tech
- Supervisor: Prof. Ling Liu
- Focus: Deep Learning Systems, Performance Analysis
- Goal: Build an efficient data and computing platform for deep learning.

Aug 2017 – Present

High-performance Distributed Graph Processing Systems with Billions of Vertices and Edges

- Distributed Data Intensive Systems Lab, Georgia Tech
- Supervisor: Prof. Ling Liu
- Focus: Algorithm Analysis & Optimization, Big Graph Processing System
- Goal: Build an innovative and elastic big graph processing system.

Aug 2017 – Present

DeepEyes: A Deep Learning Powered Localization System with Multi-modal Sensors

- Distributed Data Intensive Systems Lab, Georgia Tech
- Supervisor: Prof. Ling Liu
- Focus: Localization, Deep Learning
- Goal: Implement an out-door localization system with the deep learning model.

Aug 2017 – Present

Parallel Graph Search Algorithms Analysis & Design

- National High-Performance Computing Center (Hefei), USTC
- Supervisor: Prof. Yun Xu
- Focus: Parallel Graph Search Algorithms, Breadth-First Search (BFS)
- Achievement: Design a new parallel BFS algorithm with better performance and load balance.

Feb 2017 – Aug 2017

Detecting Large-gap Code Clones

- National High-Performance Computing Center (Hefei), USTC
- Supervisor: Prof. Yun Xu
- Focus: Source Code Processing & Indexing, Edit Distance, Detection Algorithms
- Achievement: CCAAligner, a token based large-gap clone detector (Submitted to ICSE'18).

Sep 2015 – Jul 2017

Summer Research Internship on Automatic Verification

- School of Computer Science, University of Birmingham
- Supervisor: Prof. David Parker
- Focus: *LTS* (Labeled Transition Systems Model Checker, *Game* Model Checker)
- Achievement: Implement *LTS* model checker and *Game* model checker for PRISM, a widely applied probabilistic model checker for analysis of systems, to enable it to support non-probabilistic models further.

Jul 2016 – Aug 2016

Optimization for Distributed Applications

- Advanced Computer System Architecture Laboratory, USTC
- Supervisor: Prof. Hong An
- Focus: Gromacs, WRF
- Achievement: **1st** on WRF benchmark (**1st: 100%, 2nd: 64.83%**) in Student Cluster Competition, ISC 2016

Sep 2015 – Jun 2016

PUBLICATION

- Pengcheng Wang, Jeffrey Svajlenko, **Yanzhao Wu**, Yun Xu and Chanchal K. Roy, “CCAAligner: a token based large-gap clone detector” (Submitted to ICSE'18)
- Ling Liu, **Yanzhao Wu** and Yang Zhou, “GraphLego: A Fast Graph Processing System with Resource Aware Graph Parallel Abstractions” (To be submitted to Journal.)
- **Yanzhao Wu**, Ling Liu, Wenqi Wei and Shuo Liu, “A Performance Comparison of Deep Learning Frameworks” (In preparation)
- Shuo Liu, **Yanzhao Wu**, Wenqi Wei and Ling Liu, “DeepEyes: A Deep Learning Powered Localization System with Multi-modal Sensors” (In preparation)

SKILL

- Linux: Proficient with Linux
- Programming Skills: C, C++, Python, JavaScript, Java, OpenMP, MPI, CUDA, SQL
- Tools: TensorFlow, Caffe, Git, Subversion, PRISM, L^AT_EX
